E-Governance Policy

Electronic governance or e-governance is the use of information and communication technology (ICT) for the delivery of services, exchange of information, communication transactions, and integration of various stand-alone systems between the management and the college's students, faculty, and alumni. KKC's e-governance policy has the following primary goals:

- Achieving operational efficiency;
- Promoting transactional transparency and accountability
- Ease of access to information
- Compliance with the rules and regulations of the government nodal agencies
- Increase in external visibility of the institution

The KKC e-governance system encompasses the entire academic process, from admission to graduation and beyond. The system is operated in a Wi-Fi environment with a high bandwidth. The system's components include:

1. Admissions - comprises the sale and receipt of applications, screening and selection, payment of fees, and enrollment

2. Course Delivery - Includes curriculum design and development, pedagogy selection, course delivery, and student engagement in co- and extra-curricular activities.

3. Evaluation and Assessment – comprises examination administration, evaluation, grading, and results publication

4. Administration - encompasses payroll management, attendance, recruitment and selection, performance evaluation, and professional development.

5. Management Facilities- Includes canteen, hostel, sports arena, and gym.

6. Library - Includes acquisition and storage of resources (books, etc.), issuance, return, and research access.

7. Alumni Relations – contains alumni details

8. Institutional Website - facilitates access to institutional information and interaction between KKC and its stakeholders.

It is anticipated that all stakeholders will make optimal use of the e-governance system of KKC in order to maximize the system's functions.
