

KANDASWAMI KANDAR'S COLLEGE, Velur, Namakkal (Dt)

Department of Zoology

Zoology Association Inaugural Function

Dr. Mohan presented a talk on the topic “Applied Zoology” He explained A **dairy** is a place where milk is stored and where [butter](#), [cheese](#) and other [dairy products](#) are made, or a place where those products are sold. It may be a room, a building or a larger establishment. In the United States, the word

may also describe a [dairy farm](#) or the part of a [mixed farm](#) dedicated to milk for human consumption, whether from [cows](#), [buffaloes](#), [goats](#), [yaks](#), [sheep](#), [horses](#) or [camels](#).

The attributive *dairy* describes milk-based products, derivatives and processes, and the animals and workers involved in their production, for example dairyman, dairymaid, [dairy cattle](#) or [dairy goat](#). A dairy farm produces milk and a dairy factory processes it into a variety of dairy products. These establishments constitute the global dairy industry, part of the [food industry](#).

The session was highly useful to our students and it has created an interest our students.
